

System **EW-ECO CONDENSING**

Factory-made rigid single wall relining chimney system made in stainless steel AISI 316, purpose-designed for high efficiency condensing boilers.

MATERIAL

AISI 316L

FINISHING

Standard: bright annealed (BA)
RAL colours (check prices)

WALL THICKNESS (mm)

0,4 – 0,5 – 0,6 (according to diameter)

AVAILABLE DIAMETERS (mm)

Ø80 to Ø600

CONNECTION

Male-female connection secured by locking band

APPLICATIONS

- High efficiency condensing boilers
- Condensing appliances

CHARACTERISTICS

- Installation inside a shaft (relining)
- Working temperature up to 120°C
- Continuous TIG/LASER welding in all items
- Locking band **NON INCLUDED**
- Lengths can be cut onsite
- Condensing joint seal **INCLUDED**

CE MARK NUMBER

0036 CPR 9174 029
